

SYMBIO partners unveil the dates of the upcoming workshops during its project Info Day

- The online event brought together 48 participants from different European regions interested in circular bioeconomy solutions.
- Five countries will host the two-day technical workshop between February and May 2025.

PRESS RELEASE. 5/11/2024. The [SYMBIO Info Day](#) on October 23, 2024, despite the complexity of the topic and the challenge of coordinating a simultaneous online event with several presenters from different countries, **proved to be a huge success**, bringing together 48 participants from Spain, Italy, Austria, Slovenia, Croatia, and Belgium, among others.

The SYMBIO consortium designed this very first open-to-the-public transnational webinar to provide insights into the project's progress, offer networking opportunities, and engage participants in meaningful discussions around industrial symbiosis, circularity, bio-based businesses, zero-waste production models, and AI applications, among others. And so, it was.

During the nearly forty-minute event, **attendees gained a deeper sense** of the project's point of departure, state-of-the-art, objectives, methodology, and expected results. More specifically, part of the programme was devoted to explaining how the artificial intelligence applications and big data used in the project will help to maximise the value and minimise the climate impact of organic by-products and waste, such as the innovative platform [Value Chain Generator](#), created to leverage data insights as well as advance matchmaking to develop the optimal circular bioeconomy solutions for every region and supply chain involved.

Just before the Q&A session, the consortium presented the dates and structure of the upcoming two-day technical online workshop, planned to provide regional stakeholders with operational instruments for modelling resilient bio-based businesses and their social, policy, economic, and environmental impacts using free AI tools. Five countries will host the online event **between February and May 2025**.

Horizon Europe

THE NEXT EU RESEARCH & INNOVATION PROGRAMME (2021 – 2027)

ITALY WORKSHOPS

- Session 1: 20/03/2025
- Session 2: 21/05/2025

SPAIN WORKSHOPS

- Session 1: 19/03/2025
- Session 2: 2/04/2025

CROATIAN WORKSHOPS

- Session 1: 12/03/2025
- Session 2: 13/03/2025

AUSTRIAN WORKSHOPS

- Session 1: 24/03/2025
- Session 2: 25/03/2025

BELGIUM WORKSHOPS

- Session 1: 20/02/2025
- Session 2: 3/04/2025

SLOVENIAN WORKSHOPS

- Session 1: 17/02/2025
- Session 2: 16/04/2025

About SYMBIO

SYMBIO brings together **eight partners from six EU countries** (Italy, Austria, Slovenia, Croatia, Spain, and Belgium) committed to building bio-based business models based on circularity from the design stage and industrial symbiosis. SYMBIO's solutions enable companies to **identify additional circular value** from their products and materials and mitigate risks from raw material volatility, pricing, and local material supply. Thanks to industrial symbiosis approaches, more circular solutions are available for companies, ensuring wider diffusion and supporting the implementation of sustainable business practices.
